

Mathematics Leadership in a Time of Change: Building Leaders at all Levels

St. Louis Fall Seminar
Marriott St. Louis Grand
St. Louis, MO

November 16, 2016

8:00 am–4:00 pm

FALL SEMINAR DETAILS

Take your leadership to new heights in St. Louis. Join NCSM president John Staley for a full day of hands-on learning. This presentation will focus on Leading Mathematics Curriculum Coherence and give you concrete resources to take back to your school and district to lead others in professional learning. Breakfast and lunch is included and sponsored by ExploreLearning.

NCSM is striving to provide year-long professional learning opportunities that follow the theme of Mathematics Leadership in a Time of Change: Building Leaders at All Levels. Threaded throughout this series of seminars we will be shifting mindsets and beliefs about teaching and learning mathematics. Utilizing It's Time and Prime resources, you will leave each of these sessions with valuable tools, tricks and a deeper understanding of the direction of mathematics education; and invaluable friendships and support from others in the mathematics community. The Fall Seminars will expand on Curriculum Leadership; and the NEW Winter Academy in Atlanta, will take on the Teaching and Learning Leadership Principle. Please join us for one or all of these events.
