
Rubric for Lessons and Units: Educators Evaluating Quality Instructional Products (EQuIP)

Source: Tri-State Collaborative

Tools: Curriculum

DESCRIPTION

Educators Evaluating Quality Instructional Products (EQuIP rubric) was an initiative of the American Diploma Project (ADP) designed to identify high-quality materials that communicate the instructional demands of the CCSS. Utilizing the rubric with teachers and teams builds capacity with creating rich mathematical learning experiences and a shared understanding of quality and alignment of instructional resources to the Common Core across the nation. This rubric also provides feedback to teachers and teams who are developing curriculum and more specifically, lesson and unit design to meet the demands of the Common Core.

STRATEGIES FOR IMPLEMENTATION

Coaches and teachers can utilize this tool to analyze and evaluate lessons/units that are being created to align with the letter and spirit of the Common Core. The rubric has 4 categories:

- Alignment to the depth of the Common Core
- Key shifts in the CCSS
- Instructional Supports
- Assessment

Teachers and Coaches can use the rubric prior to creating lessons/units to identify quality aspects of a Common Core lesson/unit or use this tool to evaluate current lessons to determine the quality and alignments to the Common Core.
