

New in 2014! NCSM has an App!

As the theme – *JAZZED UP MATHEMATICS LEADERSHIP Building Systems to Trumpet Achievement* suggests, our 46th NCSM Annual Conference is designed to provide you with a lively, rich, professional learning experience that will support your leadership needs over the next 12 months. It features an exciting mix of over 300 sessions by mathematics education’s most influential, exciting, and knowledgeable speakers. A major focus of this year’s conference is the effective implementation of the *Common Core State Standards* and preparations for the upcoming *PARCC* and *SBAC* assessments. As always, mathematics leaders can expect to learn about the latest in research and resources for mathematics education. One of these exciting new resources will be the release of the *NCSM* publication - *It’s Time: Leadership Framework* as a follow-up to the popular *NCSM PRIME Leadership Framework*.
