

Figure 2.10. Strategies to Support Engaging Stakeholders

Strategy	How do we use this strategy? How might we use this strategy?
Create district and school teams that use data to set SMART goals and subsequent action steps.	
Ensure that progress toward goals is continuously monitored and revised as data analysis calls for.	
Develop mechanisms to communicate and inform families and the community about mathematics curriculum and research-affirmed instructional practices.	
Invite families and the community to be partners in dialoguing about changes and implementation of the school mathematics programs.
