JUNE 28-30, 2021

2021 NCSM SUMMER LEADERSHIP ACADEMY

Ensuring Equitable Practices through BOLD Mathematics Leadership

Bold mathematics leadership and coaching is recognized as one of the most powerful ways to ensure equitable instruction and build collective teacher efficacy to increase student learning. To meet the vision of ALL students learning mathematics at high levels, understanding the *Framework for Leadership in Mathematics Education* and leading equitable mathematics coaching programs is key.

In this summer academy we will address the following essential questions:

How will we **ensure equitable practices** through instructional leadership and coaching in order to improve student access and achievement in mathematics?

- **For students** - How will we **Advocate** for equitable practices to increase student access and achievement for each and every learner?
- **For teachers** - How will we **Empower** teachers to leverage a shared vision focused on equity for mathematics instruction and build collective efficacy with content and pedagogical knowledge?
- **For leaders** - How will we **Design**, implement, and **Monitor** structures to ensure equitable practices at the classroom, school, and systemic levels through instructional leadership and coaching?
- **For All** - How do we challenge unproductive beliefs in order to strengthen student identities and improve student learning?

Join us along with our professional learning directors for the NCSM Summer Leadership Academy June 28-30, 2021. If you are a teacher leader, coach, department chair, administrator or supervisor you won't want to miss out on these three days of learning!

REGISTRATION INCLUDES THE FOLLOWING RESOURCE:

- *NCSM Essential Actions: Framework for Leadership in Mathematics Education (NCSM, 2020)*
